✉: sekper@wika-beton.co.id*Tim S&P Global Kunjungi Kantor Pusat WIKA Beton*

Jakarta, 26 Juni 2026 — Merespons dinamika pasar konstruksi yang kian mengedepankan kepatuhan terhadap aspek *Environmental, Social, and Governance* (ESG), delegasi lembaga pemeringkat internasional S&P Global menyambangi Kantor Pusat PT Wijaya Karya Beton Tbk (WIKABeton) di Jakarta pada Rabu (24/6).

Sebagai perusahaan yang terdaftar dan secara aktif berpartisipasi dalam asesmen S&P Global sejak tahun 2022 hingga 2025, WIKABeton sukses mencatatkan lonjakan skor ESG yang impresif hingga menyentuh angka 71. Capaian metrik tersebut terpublikasi dalam platform Capital IQ Pro, sehingga rekam jejak WIKABeton masuk ke dalam radar investor institusional tingkat global.

Dalam sesi diskusi bersama manajemen, S&P Global memaparkan urgensi kalibrasi pelaporan keberlanjutan menuju standar *International Sustainability Standards Board* (ISSB) di kawasan Asia Pasifik, yang menitikberatkan pada metrik pengukuran emisi. Kehadiran langsung S&P Global di WIKABeton di tengah dinamika pasar Indonesia membuka perspektif baru terkait praktik terbaik global dalam mengalkulasi kerentanan fisik aset secara spesifik, serta memitigasi dampak finansial dari transisi iklim terhadap rantai pasok operasional secara kuantitatif.

Menilik tren keberlanjutan tersebut, Direktur Teknik & Produksi WIKABeton, Verly Widianoro, menegaskan bahwa kunjungan ini menjadi bukti praktik ESG yang telah dilakukan WIKABeton.

"Kehadiran S&P Global memvalidasi bahwa standar produksi WIKA Beton telah terkalibrasi dengan parameter ketat internasional. WIKA Beton menjadikan skor 71 ini bukan sekadar pencapaian seremonial, melainkan landasan strategis untuk melakukan *gap assessment*, mengukur kerentanan aset, dan memastikan daya saing operasional WIKA Beton tetap relevan secara global."

Menyambung strategi penguatan tersebut, Leo Kurniawan, *Director of Business Development – Sustainable* S&P Global, menambahkan bahwa penilaian dari lembaga pemeringkat sejatinya adalah katalis bagi transformasi internal perusahaan.

"Penilaian S&P bukanlah tujuan akhir. Sebaliknya, melalui seluruh proses ini, kami mendorong perusahaan untuk membangun kapasitas internalnya. Hal ini bertujuan agar perusahaan memiliki kerangka kerja yang sangat solid, serta metodologi yang ilmiah dan tangguh dalam menguji berbagai data. Pada akhirnya, kapabilitas ini mempersiapkan perusahaan untuk merumuskan strategi yang secara spesifik disesuaikan dengan kebutuhan bisnis."

Paradigma transformasi tersebut selaras dengan penekanan Judy Su, *Head of East Asia, Climate and Sustainability Services* S&P Global, yang menitikberatkan pada pentingnya metrik berbasis angka riil.

"Keberlanjutan bukan lagi sekadar narasi, bukan lagi sebatas deskripsi atau semacam analisis kualitatif mengenai apa yang telah kita lakukan. Keberlanjutan harus menjadi sebuah penilaian yang kuantitatif, terukur, dan berdampak, sehingga benar-benar dapat dipahami oleh para investor dan manajemen."

Transparansi metrik, wawasan manajemen risiko iklim berbasis data, dan transformasi bisnis ini akan diintegrasikan secara penuh sebagai fondasi inti ekspansi bisnis WIKA Beton ke depan. Melalui praktik ESG, WIKA Beton memproyeksikan penciptaan nilai jangka panjang yang menguntungkan seluruh pemegang saham, sekaligus mengukuhkan daya tahan fundamental WIKA Beton sebagai bagian dari ekosistem Danantara dan BUMN.

Jakarta, June 26, 2026 — Responding to the dynamics of the construction market, which increasingly prioritizes compliance with Environmental, Social, and Governance (ESG) aspects, a delegation from the international rating agency S&P Global visited the Head Office of PT Wijaya Karya Beton Tbk (WIKABeton) in Jakarta on Wednesday (6/24).

As a listed company that has actively participated in S&P Global assessments from 2022 to 2025, WIKABeton has successfully recorded an impressive surge in its ESG score, reaching 71. This metric achievement is published on the Capital IQ Pro platform, thereby placing WIKABeton's sustainability track record on the radar of global institutional investors.

During a discussion session with the management, S&P Global outlined the urgency of calibrating sustainability reporting toward the International Sustainability Standards Board (ISSB) standards in the Asia-Pacific region, which emphasizes emission measurement metrics. S&P Global's direct presence at WIKABeton amidst the competitive dynamics of the Indonesian market opens new perspectives on global best practices in specifically calculating the physical vulnerabilities of assets, as well as quantitatively mitigating the financial impact of climate transition on the operational supply chain.

Observing these sustainability trends, WIKABeton's Director of Engineering and Production, Verly Widianoro, emphasized that this visit serves as factual evidence of the ESG practices implemented by WIKABeton.

"The presence of S&P Global validates that WIKABeton's production standards have been calibrated against strict international parameters. WIKABeton views this score of 71 not merely as a ceremonial achievement, but as a strategic foundation for conducting gap assessments, measuring asset vulnerabilities, and ensuring WIKABeton's operational competitiveness remains globally relevant," Verly stated.

Expanding on this strengthening strategy, Leo Kurniawan, Director of Business Development – Sustainable1 at S&P Global, added that assessments from rating agencies are essentially catalysts for a company's internal transformation.

"An S&P assessment is not the end goal. Rather, throughout this process, we want companies to build their internal capacity. This aims to ensure that companies have a highly solid framework, as well as a scientific and robust methodology to test various data. Ultimately, this capability prepares companies to formulate strategies that are specifically tailored to their business needs," he explained.

This transformation paradigm aligns with the emphasis made by Judy Su, Head of East Asia, Climate and Sustainability Services at S&P Global, who highlighted the importance of metrics based on real numbers.

"Sustainability is no longer just a story, it is no longer just descriptive or some kind of qualitative analysis about what we have done, but it has to be a quantitative, measurable, and impactful assessment, so that we can actually make it understandable for investors and management."

Metric transparency, data-driven climate risk management insights, and this business transformation will be fully integrated as the core foundation for WIKA Beton's future business expansion. Through its precise ESG practices, WIKA Beton projects long-term value creation that benefits all shareholders, while simultaneously fortifying WIKA Beton's fundamental resilience as part of the Danantara and BUMN (State-Owned Enterprises) ecosystems.
