**Jakarta, 15 Juli 2026** — Pembangunan kawasan industri terintegrasi penggerak ekonomi di wilayah timur Indonesia kini tengah dilaksanakan, salah satunya melalui pembangunan pelabuhan (*port*) PT Indonesia Huabao Industrial Park (IHIP) di Kabupaten Luwu Timur, Sulawesi Selatan. Dalam mendukung percepatan proyek ini, PT Wijaya Karya Beton Tbk (WIKABeton) melakukan pengiriman perdana tiang pancang dari *Precast Concrete Plant* Bogor menuju lokasi proyek tersebut pada Rabu (1/7).

Pembangunan pelabuhan tersebut selaras dengan arah pengembangan Kawasan Industri Malili sebagai Proyek Strategis Nasional (PSN) melalui sinergi pemerintah daerah dengan PT IHIP. Kawasan industri tersebut akan dilengkapi fasilitas pelabuhan industri, *smelter* nikel, pembangkit listrik, pabrik, dan fasilitas lainnya yang dapat membuka jalan bagi pertumbuhan ekonomi serta memberikan dampak sosioekonomi yang positif bagi masyarakat sekitar.

Dalam proyek ini, WIKABeton mengirimkan produk tiang pancang sebanyak 633 batang berdiameter 1.200 mm dan panjang 20 m. Produk ini diproduksi di Jalur 8 *Plant* Bogor yang sudah memiliki sertifikat *Environmental Product Declaration* (EPD) dan *GreenShip Solution Endorsement* (GSE) yang memperkuat komitmen WIKABeton terhadap praktik keberlanjutan. Penggunaan diameter besar untuk tiang pancang pada struktur dermaga untuk memastikan kapasitas daya dukung beban yang tinggi, tahanan lentur yang memadai, dan jangkauan hingga ke lapisan tanah keras, serta durabilitas ekstra terhadap lingkungan agresif di daerah pantai.

Keandalan kualitas inilah yang ditekankan oleh Sekretaris Perusahaan WIKABeton, Ignatius Harry, dalam mendukung keberhasilan proyek strategis nasional tersebut.

“WIKABeton selalu mendedikasikan produk dengan daya tahan terbaik. Keterlibatan kami untuk pembangunan Kawasan Industri Malili ini diharapkan memberikan dampak berkelanjutan bagi peningkatan perekonomian sekitar dengan infrastruktur yang dibangun menggunakan produk berkualitas dan ramah lingkungan.”

Partisipasi WIKABeton pada proyek pelabuhan PT IHIP ini akan menciptakan nilai tambah perusahaan dalam mendukung pembangunan infrastruktur nasional. Sebagai bagian dari ekosistem BUMN dan Danantara, WIKABeton terus berusaha menciptakan kinerja finansial yang positif.

**Jakarta, July 15, 2026** — The development of integrated industrial estates to drive economic growth in eastern Indonesia is currently underway, notably including the construction of a port for PT Indonesia Huabao Industrial Park (IHIP) in East Luwu Regency, South Sulawesi. To support the acceleration of this project, PT Wijaya Karya Beton Tbk (WIKA Beton) dispatched its inaugural shipment of concrete piles from the Bogor Precast Concrete Plant to the project site on Wednesday (7/1).

The construction of the port aligns with the development objectives of the Malili Industrial Estate as a National Strategic Project (PSN), realized through a synergy between the regional government and PT IHIP. This industrial estate will be equipped with industrial port facilities, a nickel smelter, power plants, manufacturing plants, and other supporting facilities. These developments are poised to pave the way for economic growth and generate positive socioeconomic impacts for the surrounding communities.

For this project, WIKA Beton is supplying 633 units of concrete piles, each measuring 1,200 mm in diameter and 20 meters in length. These products are manufactured on Line 8 of the Bogor Plant, which has attained the Environmental Product Declaration (EPD) and Greenship Solution Endorsement (GSE) certifications, further reinforcing WIKA Beton's commitment to sustainable practices. The utilization of large-diameter piles for the pier structure ensures high load-bearing capacity, adequate bending resistance, and sufficient reach to hard soil layers, while also providing exceptional durability against the aggressive conditions typical of coastal environments.

This exceptional reliability and quality were underscored by the Corporate Secretary of WIKA Beton, Ignatius Harry, as pivotal in supporting the successful execution of this national strategic project.

"WIKA Beton consistently delivers products with paramount durability. It is our hope that our involvement in the development of the Malili Industrial Estate will yield a sustainable impact on enhancing the local economy, facilitated by infrastructure built using high-quality and eco-friendly products," stated Harry.

WIKA Beton's participation in the PT IHIP port project will generate added value for the company in its ongoing support of national infrastructure development. As an integral part of the State-Owned Enterprises (SOE) and Danantara ecosystem, WIKA Beton continuously strives to achieve positive financial performance.
