Jakarta, 7 Agustus 2026 — WIKA Group melalui program Tanggung Jawab Sosial dan Lingkungan (TJSL) yang dipimpin oleh PT Wijaya Karya Beton Tbk (WIKABeton) melaksanakan program bertema *Pari Island Circular Waste Initiative* di Pulau Pari, Kepulauan Seribu, pada Kamis (6/8). Program kolaboratif ini merupakan wujud sinergi entitas WIKABeton Group bersama pemerintah daerah, Komunitas Lintas Sektoral Pulau Pari, dan masyarakat dalam membangun sistem pengelolaan sampah berbasis ekonomi sirkular guna mendukung terwujudnya destinasi wisata bahari yang bersih, lestari, dan berkelanjutan. Bupati Kepulauan Seribu Muhammad Fajar Churniawan beserta jajaran turut hadir dalam kegiatan tersebut.

Program ini melibatkan PT Wijaya Karya (Persero) Tbk, PT Wijaya Karya Beton Tbk (WIKABeton), PT Wijaya Karya Bangunan Gedung Tbk (WEGE), PT Wijaya Karya Bitumen, PT Wijaya Karya Industri & Konstruksi (WIKON), PT Wijaya Karya Industri Energi (WINNER), PT Wijaya Karya Realty (WIKAREALTY), PT Wijaya Karya Rekayasa Konstruksi (WRK), PT Wijaya Karya Serang Panimbang, dan PT Wijaya Karya Tirta Jaya Jatiluhur (WTJJ). Kolaborasi ini dibangun untuk menjawab tantangan pengelolaan sampah di tengah tingginya aktivitas wisata di Pulau Pari sekaligus memperkuat ekosistem pesisir melalui pendekatan pemberdayaan masyarakat.

Melalui tema *Pari Island Circular Waste Initiative*, program TJSL WIKABeton Group diwujudkan dalam tiga inisiatif utama. Pertama, Pengelolaan Sampah di SD-SMP Negeri 1 Atap Pulau Pari melalui penyediaan sarana pendukung pengelolaan sampah organik dan anorganik menggunakan *maggot* yang disertai edukasi bagi siswa dan tenaga pendidik. Kedua, Pengembangan Bank Sampah Pulau Pari untuk memperkuat sistem pengelolaan dan pemanfaatan sampah berbasis masyarakat yang dikelola bersama Komunitas Lintas Sektoral Pulau Pari. Ketiga, Beautifikasi dan Penghijauan Pantai Kresek melalui penataan kawasan wisata, penyediaan fasilitas pendukung kebersihan, serta kegiatan penghijauan sebagai upaya menjaga kelestarian lingkungan pesisir.

WIKABeton dipercaya sebagai *lead collaborator* dalam pelaksanaan program TJSL WIKAGroup ini berkat rekam jejak pendampingan masyarakat yang telah dilakukan di Pulau Pari sejak 2022. Inisiatif ini hadir sebagai respons terhadap tingginya volume sampah yang mencapai sekitar satu ton per minggu akibat lonjakan kunjungan wisatawan hingga 2.500 orang setiap akhir pekan.

Chief of Sustainability Officer WIKABeton, Verly Widianoro, menegaskan bahwa keberhasilan program ini tidak hanya ditentukan oleh penyediaan infrastruktur, tetapi juga oleh keterlibatan aktif masyarakat dalam membangun sistem pengelolaan sampah yang berkelanjutan.

"Saat kembali ke Pulau Pari, kami melihat semangat warga yang sangat besar untuk merawat tempat tinggal mereka. Karena itu, kami tidak sekadar memberi bantuan alat, tapi juga membangun sistem. Kami ingin melihat warga bangga karena sampah yang dulunya jadi masalah, sekarang justru bisa menjadi rezeki untuk keluarga dan memajukan kawasan mereka sendiri."

Melalui sinergi lintas entitas dan kolaborasi bersama berbagai pemangku kepentingan, WIKAGroup terus memperkuat komitmennya dalam menciptakan dampak sosial, lingkungan, dan ekonomi yang berkelanjutan. Program ini diharapkan menjadi model kolaborasi TJSL yang mampu mendorong pengelolaan sampah berbasis ekonomi sirkular sekaligus meningkatkan kualitas lingkungan dan kesejahteraan masyarakat pesisir di Pulau Pari.

Jakarta, August 7, 2026 — WIKA Group, through the Corporate Social and Environmental Responsibility (CSR) program led by PT Wijaya Karya Beton Tbk (WIKABeton), carried out a program themed the Pari Island Circular Waste Initiative in Pari Island, Thousand Islands, on Thursday (6/8). This collaborative program is a manifestation of synergy among WIKA Group entities, the local government, the Pari Island Cross-Sectoral Community, and the public in building a circular economy-based waste management system to support the realization of a clean, preserved, and sustainable marine tourism destination. The Regent of Thousand Islands, Muhammad Fajar Churniawan, along with his ranks, was also present at the event.

This program involves PT Wijaya Karya (Persero) Tbk, PT Wijaya Karya Beton Tbk (WIKABeton), PT Wijaya Karya Bangunan Gedung Tbk (WEGE), PT Wijaya Karya Bitumen, PT Wijaya Karya Industri & Konstruksi (WIKON), PT Wijaya Karya Industri Energi (WINNER), PT Wijaya Karya Realty (WIKAREalty), PT Wijaya Karya Rekayasa Konstruksi (WRK), PT Wijaya Karya Serang Panimbang, and PT Wijaya Karya Tirta Jaya Jatiluhur (WTJJ). This collaboration was built to address waste management challenges amidst high tourism activity on Pari Island while simultaneously strengthening the coastal ecosystem through a community empowerment approach.

Through the Pari Island Circular Waste Initiative theme, the WIKA Group's TJSL program is manifested in three main initiatives. First, Waste Management at the Pari Island One-Roof Public Elementary and Junior High School (SD-SMP Negeri 1 Atap) through the provision of supporting facilities for organic and inorganic waste management using maggots, accompanied by education for students and educators. Second, the Development of the Pari Island Waste Bank to strengthen the community-based waste management and utilization system co-managed with the Pari Island Cross-Sectoral Community. Third, the Beautification and Greening of Kresek Beach through the arrangement of the tourism area, the provision of hygiene-supporting facilities, and greening activities as an effort to preserve the coastal environment.

WIKABeton was trusted as the lead collaborator in the implementation of this WIKAGroup TJSL program thanks to its track record of community mentoring that has been carried out on Pari Island since 2022. This initiative comes as a response to the high volume of waste, which reaches approximately one ton per week due to a surge in tourist visits of up to 2,500 people every weekend.

WIKA Beton's Chief Sustainability Officer, Verly Widianoro, emphasized that the success of this program is not only determined by the provision of infrastructure but also by the active involvement of the community in building a sustainable waste management system.

"Returning to Pari Island, we saw the residents' immense enthusiasm for taking care of their living environment. Therefore, we do not merely provide equipment assistance, but we also build a system. We want to see the residents proud because the waste that used to be a problem can now actually become a source of income for their families and advance their own area."

Through cross-entity synergy and collaboration with various stakeholders, WIKA Group continues to strengthen its commitment to creating sustainable social, environmental, and economic impacts. This program is expected to become a CSR collaboration model capable of driving circular economy-based waste management while simultaneously improving environmental quality and the welfare of the coastal community on Pari Island.
